

Trent D. Buskirk, Ph.D. has recently joined the new School of Data Science at Old Dominion University. Prior to this appointment, Trent was the Novak Family Distinguished Professor of Data Science and outgoing Chair of the Applied Statistics and Operations Research Department at Bowling Green State University. Dr. Buskirk is a Fellow of the American Statistical Association and his research is positioned at the intersection of **survey science**, data science, **computational social science**, and **human–AI interaction**. His specific research interests include Schema-Driven LLM-Based Inference, big data quality, recruitment methods through social media, the use of big data and machine learning methods for health, social and survey science design and analysis, mobile and smartphone survey designs and in methods for calibrating and weighting samples and fairness in AI models and interpretable ML methods. Trent has also been involved in various professional organizations serving as the President of the Midwest Association for Public Opinion Research in 2016, the Conference Chair for AAPOR in 2018 and a member of the scientific committee for the BigSurv series of conferences since 2018. Trent as also served as an Associate Editor (Methods) for the Journal of Survey Statistics and Methodology. Dr. Buskirk is currently serving on the AAPOR Responsible Integration of AI in Survey Research task force. When Trent is not geeking out over data science or survey research, he's likely out playing a competitive game of Pickleball!
